Ayelet Shakovitzky - Software Engineer

058-325-3442 | ayeletbinder@gmail.com | GitHub | LinkedIn

Profile

I possess strong analytical skills and a proven ability to learn complex technologies quickly. I am a disciplined independent learner and am a strong team collaborator, driven to achieve goals and solve real-world problems through clean and effective code.

Education

2022-2025 Completed studies for a Software Engineer Certificate at "Mahat" (GPA: 97). In addition, participated in the Kama Tech's "Ultra Code" program, which included various advanced courses.

2019-2022 High School student with a matriculation in Software Engineering.

Experience

2026 **Clinical Data Scientist – Python Developer & Test Automation (Playwright), Bioforum:** Joined the product team at Bioforum, a clinical research data company. Developed and maintained data-processing pipelines in Python on Azure, wrote and ran automated E2E tests with Playwright, and identified and fixed bugs. Used Claude Code in the daily development workflow as part of a multidisciplinary team.

2024-2025 **Practicum - chrome add-on:** Practicum at "Extra Code" - Development of a chrome add-on using Node.js with microservices for the backend, and React for the frontend, utilizing Agile methodology and using GitHub for version management.

Projects

Web API - Final Project
The front-end interface was **React** to ensure an intuitive user experience. The server-side was built with **C#** using Entity Framework, with the database managed by **SQL** Server. The project included connecting to several Google APIs, such as Google Maps and Gmail.

Development of a recipe sharing website
I created an engaging front-end interface using **Angular** and implemented the server-side with **Node.js**. The database was managed using **MongoDB**, hosted on MongoDB Atlas.

Real-time chat application - Python
Development in **Python** and using **Django** (using Ajax and jQuery).

Matriculation project
Developed a matriculation project using **C#** WinForms technology, implementing **OOP** principles and connecting to an **Access** database.

Technical Skills

Programming: Python, C# .NET Core, web API + creating Swagger, C, C++, Java, Assembly
Web: JavaScript, HTML5, CSS, React, Angular18, Node.js - Express
Testing & Automation: Playwright, E2E (end-to-end) testing
Databases: SQL Server, Access, MySQL, MongoDB
Development environments: Visual Studio 2022, VS Code, NetBeans, IntelliJ IDEA, Robo 3T, SQL Server Management Studio
Extension courses: Algorithms, Data Structures, Graph Theory, Mathematics, Operating Systems, Digital Systems, Agile - Scrum, AWS, Spoken English course, GIT Version Control
Languages: **Hebrew** - native speaker, **English** - high level
